NCL Fall 2024 Individual Game Scouting Report

Dear Chris Seager,

Thank you for participating in the National Cyber League (NCL) Fall 2024 Season! Our goal is to prepare the next generation of cybersecurity professionals, and your participation is helping achieve that goal.

The NCL was founded in May 2011 to provide an ongoing virtual training ground for collegiate students to develop, practice, and validate their cybersecurity skills in preparation for further learning, industry certifications, and career readiness. The NCL scenario-based challenges were designed around performance-based exam objectives of CompTIA certifications and are aligned to the National Initiative for Cybersecurity Education (NICE) Cybersecurity Workforce Framework published by the National Institute of Standards and Technology (NIST).

As you look to a future career in cybersecurity, we hope you find this report to be valuable in both validating skills and identifying areas for improvement across the nine NCL skills categories. You can use this NCL Scouting Report to:

- Validate your skills to employers in any job application or professional portfolio;
- Show case your achievements and strengths by including the Score Card view of your performance as part of your résumé or simply sharing the validation link so that others may view the detailed version of this report.

The NCL Fall 2024 Season had 9,260 students/players and 573 faculty/coaches from more than 540 two- and four-year schools & 230 high schools across all 50 U.S. states registered to play. The Individual Game Capture the Flag (CTF) event took place from October 25 through October 27. The Team Game CTF event took place from November 8 through November 10. The games were conducted in real-time for students across the country.

NCL is powered by Cyber Skyline's cloud-based skills evaluation platform. Cyber Skyline hosted the scenario-driven cybersecurity challenges for players to compete and track their progress in real-time.

To validate this report, please access: cyberskyline.com/report/63GF93Y5Q5M0

CompTIA

Based on the performance detailed in this NCL Scouting Report, you have earned **9 hours** of Continuing Education Units (CEUs) as approved by CompTIA. You can learn more about the NCL - CompTIA alignment via nationalcyberleague.org/partners.

Congratulations for your participation in the NCL Fall 2024 Individual Game! We hope you will continue to develop your knowledge and skills and make meaningful contributions as part of the Information Security workforce!

Dr. David Zeichick
NCL Commissioner

NCL Fall 2024 Individual Game

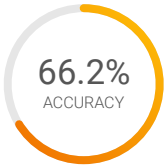
The NCL Individual Game is designed for student players nationwide to compete in realtime in the categories listed below. The Individual Game evaluates the technical cybersecurity skills of the individual, without the assistance of others.

873 RD PLACE OUT OF 8484
NATIONAL RANK

90th National Percentile

1715 POINTS OUT OF 3000
PERFORMANCE SCORE

Average: 1008.9 Points



Average: 67.8%

Average: 41.1%

Cryptography

305 POINTS OUT OF 330

80.0% ACCURACY

COMPLETION: 94.1%

Identify techniques used to encrypt or obfuscate messages and leverage tools to extract the plaintext.

Enumeration & Exploitation

120 POINTS OUT OF 330

100.0% ACCURACY

COMPLETION: 50.0%

Identify actionable exploits and vulnerabilities and use them to bypass the security measures in code and compiled binaries.

Forensics

100 POINTS OUT OF 315

60.0% ACCURACY

COMPLETION: 37.5%

Utilize the proper tools and techniques to analyze, process, recover, and/or investigate digital evidence in a computer-related incident.

Log Analysis

160 POINTS OUT OF 300

35.7% ACCURACY

COMPLETION: 76.9%

Utilize the proper tools and techniques to establish a baseline for normal operation and identify malicious activities using log files from various services.

Network Traffic Analysis

210 POINTS OUT OF 320

70.6% ACCURACY

COMPLETION: 85.7%

Identify malicious and benign network traffic to demonstrate an understanding of potential security breaches.

Open Source Intelligence

355 POINTS OUT OF 355

76.7% ACCURACY

COMPLETION: 100.0%

Utilize publicly available information such as search engines, public repositories, social media, and more to gain in-depth knowledge on a topic or target.

Password Cracking

135 POINTS OUT OF 340

93.8% ACCURACY

COMPLETION: 53.6%

Identify types of password hashes and apply various techniques to efficiently determine plaintext passwords.

Scanning & Reconnaissance

130 POINTS OUT OF 300

45.5% ACCURACY

COMPLETION: 50.0%

Identify and use the proper tools to gain intelligence about a target including its services and potential vulnerabilities.

Web Application Exploitation

100 POINTS OUT OF 310

40.0% ACCURACY

COMPLETION: 33.3%

Identify actionable exploits and vulnerabilities and use them to bypass the security measures in online services.

Note: Survey module (100 points) was excluded from this report.

Chris Seager
seagerjc@appstate.edu

Cryptography Module

Identify techniques used to encrypt or obfuscate messages and leverage tools to extract the plaintext.

723 RD PLACE OUT OF 8484
NATIONAL RANK

305 POINTS OUT OF 330
PERFORMANCE SCORE

80.0% ACCURACY

94.1% COMPLETION

92nd National Percentile

Average: 209.0 Points

Average: 72.6%

Average: 64.6%

Bases (Easy)

30 POINTS OUT OF 30

100.0% ACCURACY

COMPLETION: 100.0%

Analyze and obtain the plaintext from messages encoded with common number bases.

Shift (Easy)

40 POINTS OUT OF 40

100.0% ACCURACY

COMPLETION: 100.0%

Analyze and obtain the plaintext for a message encrypted with a shift cipher.

Number Codes (Easy)

40 POINTS OUT OF 40

100.0% ACCURACY

COMPLETION: 100.0%

Analyze and obtain the plaintext for a message encoded using ASCII codes.

NATO (Easy)

40 POINTS OUT OF 40

100.0% ACCURACY

COMPLETION: 100.0%

Analyze and obtain the plaintext for a message encoded using the NATO alphabet.

Message Signature (Medium)

35 POINTS OUT OF 60

66.7% ACCURACY

COMPLETION: 66.7%

Identify tampered emails by using PGP signatures.

Beep Beep (Medium)

60 POINTS OUT OF 60

50.0% ACCURACY

COMPLETION: 100.0%

Decoded a message that is spelled out using dial tone sounds.

Tampered (Hard)

60 POINTS OUT OF 60

100.0% ACCURACY

COMPLETION: 100.0%

Use CRC checksums to identify a tampered message.

Chris Seager
seagerjc@appstate.edu

Enumeration & Exploitation Module

Identify actionable exploits and vulnerabilities and use them to bypass the security measures in code and compiled binaries.

1503 RD PLACE OUT OF **8484**
NATIONAL RANK

120 POINTS OUT OF 330
PERFORMANCE SCORE

100.0% ACCURACY

50.0% COMPLETION

83rd National Percentile

Average: 145.2 Points

Average: 72.5%

Average: 52.0%

Source (Easy)

110 POINTS OUT OF 110

100.0% ACCURACY

COMPLETION: 100.0%

Reverse engineer the source code of a Rust program to bypass a simple password authentication.

Speedy (Medium)

10 POINTS OUT OF 110

100.0% ACCURACY

COMPLETION: 50.0%

Reverse engineer the source code of a Golang program.

Passphrase (Hard)

0 POINTS OUT OF 110

0.0% ACCURACY

COMPLETION: 0.0%

Reverse engineer an ELF binary to break XOR encryption on a password.

Forensics Module

Utilize the proper tools and techniques to analyze, process, recover, and/or investigate digital evidence in a computer-related incident.

1309 TH PLACE OUT OF **8484**

Average: 41.1%

Table (Easy)

100 POINTS OUT OF 100

60.0% ACCURACY

COMPLETION: 100.0%

Analyze an ARP table to investigate an ARP spoofing attack.

Plant (Medium)

0 POINTS OUT OF 100

0.0% ACCURACY

COMPLETION: 0.0%

Extract a Linux installer and cpio file to investigate a filesystem.

Incident Response (Hard)

0 POINTS OUT OF 115

0.0% ACCURACY

COMPLETION: 0.0%

Inspect and repair a live system that was tampered with to recover data.

Chris Seager
seagerjc@appstate.edu

Log Analysis Module

Utilize the proper tools and techniques to establish a baseline for normal operation and identify malicious activities using log files from various services.

1494 TH PLACE OUT OF 8484

Rules of Conduct (Easy)

25 POINTS OUT OF 25

83.3% ACCURACY

COMPLETION: 100.0%

Introductory challenge on acceptable conduct during NCL.

Vinyl (Easy)

40 POINTS OUT OF 40

100.0% ACCURACY

COMPLETION: 100.0%

Analyze an image using metadata and file properties.

Coordinates (Easy)

60 POINTS OUT OF 60

100.0% ACCURACY

COMPLETION: 100.0%

Geolocate the physical location of a server using an IP address.

NFT (Medium)

60 POINTS OUT OF 60

57.1% ACCURACY

COMPLETION: 100.0%

Conduct blockchain analysis to attribute the ownership of a NFT.

Git (Medium)

75 POINTS OUT OF 75

83.3% ACCURACY

COMPLETION: 100.0%

Obtain private company information that was posted on social media.

Password (Hard)

95 POINTS OUT OF 95

60.0% ACCURACY

COMPLETION: 100.0%

Use coordinates and a SSID to search for a location and find information from public images.

Chris Seager
seagerjc@appstate.edu

Password Cracking Module

Identify types of password hashes and apply various techniques to efficiently determine plaintext passwords.

1308 TH PLACE OUT OF 8484

53.6% COMPLETION
Average: 36.6%

85th National Percentile
Average: 101.6 Points

Hashing (Easy)

15 POINTS OUT OF 15
100.0% ACCURACY
COMPLETION: 100.0%

Generate password hashes for MD5, SHA1, and SHA256.

Rockyou (Easy)

30 POINTS OUT OF 30
75.0% ACCURACY
COMPLETION: 100.0%

Crack MD5 password hashes for password found in the rockyou breach.

Windows (Easy)

30 POINTS OUT OF 30
100.0% ACCURACY
COMPLETION: 100.0%

Crack Windows NTLM password hashes using rainbow tables.

Pattern (Medium)

45 POINTS OUT OF 45
100.0% ACCURACY
COMPLETION: 100.0%

Build a wordlist or pattern rule to crack password hashes of a known pattern.

ZIP (Medium)

0 POINTS OUT OF 50
0.0% ACCURACY
COMPLETION: 0.0%

Crack the insecure password for a protected zip file.

Wordlist (Hard)

15 POINTS OUT OF 65
100.0% ACCURACY
COMPLETION: 50.0%

Build a wordlist to crack passwords not found in common wordlists.

Complexity (Hard)

0 POINTS OUT OF 105
0.0% ACCURACY
COMPLETION: 0.0%

Build a custom wordlist to crack passwords by augmenting permutation rules using known password complexity requirements.

Chris Seager
seagerjc@appstate.edu

Scanning & Reconnaissance Module
